Read Something (from *Mission Anti-multifunction* series) holds books for daily reading time. The shelf itself works as a giant bookmark. Users can place the book they are reading on top to remind them to keep reading it. The negative space functions as a physical reading list, which provides ample storage space for books the user plans to read.

Material

Powder coated steel

Dimensions

8.5" x 8.5" x 28.25" (Large)

8.5" x 8.5" x 11" (Small)
